-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Mejlso (3,181,411). Mejlso has been applied as suggested by the Board of Patent Appeals as Interferences (see the bottom of page 3 in the decision of 2/27/2007). In that regard, Mejlso discloses a hole plug (10), with a head (11) having a back surface, wherein in the embodiment of Fig. 9, it is disclosed to have plate members (35, 39), separated from one another, arranged to form a cylindrical shape and including an engaging step (14 or 34); a column (37) and; a plurality of wavy plate shaped supporting means (36 and 38) connecting each of the support members to the column. The column is read as inclusive of a top part (16) thus making the column longer than the support members and the making the supporting members closer to the base. The head is shown as plate shaped on the underside but domed shaped on opposite side which makes for an inclined periphery.

***Allowable Subject Matter***

Claims 10 and 11 allowable and claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Mejlso does not

disclose the guide means as claimed and there would be no motivation to provide Mejlso with a guide means.
